

# LED Pro Upgrade

The LEDPRO is designed as a replacement for the aging LED control unit for mechanical shears. The LEDPRO is a direct plug & play controller for easy customer retrofit. The control is built with six six-foot cables that will plug directly into the existing gauge cables. Both circular plastic (CP) and military style (MS) connections are available. Almost all of the features and operation methods from the old LED control were preserved. Some new features were added.

## Control Features:

- Back gauge and Front Gauge Control
- LCD Display with 4 Lines x 40 Characters
- Inch/Metric Units are supported with Automatic Conversion from One to the Other (Fractions not Available)
- Gauge Position displayed in Three Decimal Places (Inch) and Two Decimal Places (mm)
- Manual Jog Functions from Control
- Permanent Preset Storage - 10 Back Gauge & 10 Front Gauge Dimensions
- Pedestal Mounted with 6 foot Cable Extensions
